INTRODUCTION

BONFIX B.V. supplies a large range of brass/ brass nickel plated BONFIX universal ball cocks.

TECHNICAL INFORMATION

The technical specifications are based on the current industry and regulatory status. BONFIX B.V. reserves the right to modify technical specifications without prior notice. No rights can be derived from the technical information provided in this brochure.

GENERAL

BONFIX universal ball cocks are designed for shutting off the water supply within a water supply system, irrigation system (e.g. greenhouses) or central heating system. The cocks have a full bore to retain the maximum flow capacity of the pipe. The cocks are provided with a removable red lever or wing grip for enduring smooth operation.

PRODUCT USAGE

BONFIX universal ball cocks are used in central heating installations, water supply systems and irrigation systems. Other usage, depending on pressure/temperature and medium, may be admissible by prior written approval from BONFIX B.V.

TECHNICAL SPECIFICATIONS

BONFIX universal ball cocks are made from premium quality brass (CuZn40Pb2) with nickel plating and provided with a chrome-plated ball with Teflon seal for guaranteed smooth and easy action.

QUALITY MARK

BONFIX universal ball valves do not bear a quality mark.

INSTALLATION INSTRUCTIONS

For the installation of BONFIX universal ball cocks refer to the technical documentation of compression fittings.

Other forms of usage, depending on pressure/temperature and medium, may be admissible but require prior written approval by BONFIX B.V.

 Use appropriate tools for installation and prevent damage.

WARRANTY AND LIABILITY

Warranty and liability apply as per our general terms and conditions.

Damage caused by stress corrosion is not covered under product warranty.
